# Adobe RoboHelp: Creating a Mobile App

By Willam van Weelden on 5th November 2016

RoboHelp 2015 introduces a new output: mobile apps. With this output, you create Android and iOS applications without any coding and without installing additional software. Best of all, creating apps is completely free. Only if you want to publish your app on the Apple App Store do you need a paid Apple developer account.

In this tutorial I will show you how to create an app that you can install on your Android Device.

Before you begin, ensure that you have [a free PhoneGap account](#).

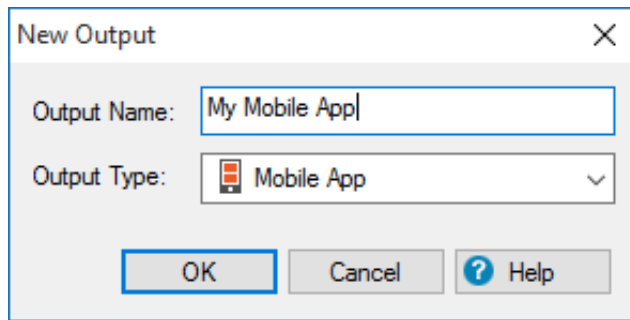

1. Open a RoboHelp project and open the Outputs(SSL) pod. (**Project > Pods > Outputs(SSL)**)
2. Click the **Create output tool** 
3. From the **Output Type** drop-down menu, choose **Mobile App**

## Categories

4. Click the **OK** button
5. From the list at the left, select **Application Details**
6. In the **Package** field, type a name for the application
7. Add a **Title**

Package*	<input type="text" value="com.iconlogic.skillsanddrills"/>	?
Version*	<input type="text" value="0.0.1"/>	?
Version Code(Android*)	<input type="text" value="1"/>	?
Title*	<input type="text" value="Skills and Drills"/>	?

8. In the **Adobe ID user for PhoneGap** section, add your Adobe ID and password

Adobe ID used for PhoneGap		
User ID*	<input type="text" value="skill@iconlogic.com"/>	<a href="#">Create PhoneGap Account</a> ?
Password*	<input type="password" value="....."/>	<input type="button" value="Validate User ID"/>

9. Click **Validate User ID** to check whether the username and password are valid
10. Click **Save and Generate**
11. Click **View Result**

Scan the QR code with your phone or use the URL to download the app and install it on your mobile device

**Note:** If you go to your PhoneGap account you can view and download your app there as well.
